## Summary

I am an aspiring backend and mobile developer who loves finding patterns and connecting dots: be it ideas from different industries, people from different backgrounds and teams, or applications from different industries. I have strong technical skills, particularly in databases, logic programming, mobile development and backend development. As an addition to my course, Computer Science, I have an academic background in mathematics, general knowledge and statistics.

Some of my projects can be found in <https://geolocation.kimworks.buzz> and <https://timetable.kimworks.buzz>.

I love solving business problems with unique algorithms and communicating complex ideas to business stakeholders.

I'm graduating in July 2023 and I'm interested in part-time or internships in flutter mobile development or backend development roles.

Please feel free to get in touch with me via email at [jhnmuinde@gmail.com](mailto:jhnmuinde@gmail.com)

Proficient:

- Node.js
- Express.js
- Flutter
- Vanilla js
- java
- Python

Knowledgeable: SQL, Next.js, php, Dart
